Barn, 2012

Undersökningstyp:	Uppmätt
Ålder:	12-18
Urvalsstorlek:	641
Område som omfattas:	Subnationell
Referenser:	Youth Health Survey Aruba 2012 - The Department of Public Health of Aruba (DPH) https://cbs.aw/wp/wp-content/uploads/2013/01/Youth-Health-Survey-Aruba-2012-Report.pdf (last accessed 08.03.22).
Anteckningar:	The sample for the Youth Health Survey Aruba 2012 was drawn by Central Bureau of Statistics (CBS) of Aruba, using the population data and of the population attending secondary schools. A random sample of all the classes of all 14 secondary schools on Aruba was drawn, comprehending 9058 adolescents. From this sample a sub sample was drawn for the collection of biometrical measurements.
Definitioner (endast tillgängliga på engelska):	In this survey the normative references for BMI for the male and female adolescents was taken from the Centre of Disease Control (CDC). BMI cut off points for the different weight categories varies for males and females.
Cutoffs:	CDC
