

# Australia

## Country report card - adults

*This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for adults. Where available, data on common and relevant obesity drivers and comorbidities are also presented.*

*View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/australia-10/>*

Contents	Page
Obesity prevalence	3
Trend: % Adults living with obesity in Australia 2007-2022	4
Trend: % Adults living with overweight or obesity in Australia 2007-2022	6
Trend: % Adults living with obesity in selected countries in the Asia/Oceania Region 1975-2019, selected countries	8
Trend: % Adults living with obesity in selected countries worldwide 1976-2018, selected countries	13
Overweight/obesity by education	18
Overweight/obesity by age	19
Overweight/obesity by region	20
Overweight/obesity by socio-economic group	21
Overweight/obesity by ethnicity	22
Double burden of underweight & overweight	24
Insufficient physical activity	25
Estimated per capita fruit intake	28
Estimated per-capita processed meat intake	29
Estimated per capita whole grains intake	30
Mental health - depression disorders	31
Mental health - anxiety disorders	34
Percent of population who cannot afford a healthy diet	37
Oesophageal cancer	38
Breast cancer	40
Colorectal cancer	41
Pancreatic cancer	43
Gallbladder cancer	45
Kidney cancer	47
Cancer of the uterus	49
Raised blood pressure	50
Raised cholesterol	53
Raised fasting blood glucose	56
Diabetes prevalence	58
Ovarian Cancer	59
Leukemia	60
Leukemia	62
Liver and intrahepatic bile duct Cancer	64
Multiple Myeloma	66
Non Hodgkin Lymphoma	68
Thyroid Cancer	70

## Obesity prevalence

### Adults, 2022-2023

Survey type: Measured

Age: 18+

Sample size: ~12846

Area covered: National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

*Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m<sup>2</sup>, obesity refers to a BMI greater than 30kg/m<sup>2</sup>.*

## % Adults living with obesity in Australia 2007-2022

### Men

Survey type:

Measured

## Overweight/obesity by education

Adults, 2022-2023

Survey type: Measured

Age: 18+

Sample size: ~12846

Area covered: National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

*Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m<sup>2</sup>, obesity refers to a BMI greater than 30kg/m<sup>2</sup>.*

## Overweight/obesity by age

### Adults, 2022-2023

Survey type: Measured

Sample size: ~12846

Area covered: National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

*Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m<sup>2</sup>, obesity refers to a BMI greater than 30kg/m<sup>2</sup>.*

## Overweight/obesity by region

### Adults, 2022-2023

Survey type: Measured

Age: 18+

Sample size: ~12846

Area covered: National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

*Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m<sup>2</sup>, obesity refers to a BMI greater than 30kg/m<sup>2</sup>.*

## Overweight/obesity by socio-economic group

Adults, 2022-2023

Survey type: Measured

Age: 18+

Sample size: ~12846

Area covered: National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

Definitions: A lower Index of Disadvantage quintile (e.g. the first quintile) indicates relatively greater disadvantage and a lack of advantage in general. A higher Index of Disadvantage (e.g. the fifth quintile) indicates a relative lack of disadvantage and greater advantage in general.

*Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m<sup>2</sup>, obesity refers to a BMI greater than 30kg/m<sup>2</sup>.*

## Overweight/obesity by ethnicity

Ethnic groups are as defined by publication of origin and are not as defined by WOF. In some instances ethnicity is conflated with nationality and/or race.

### Men, 2011

Survey type:	Self-reported
Age:	18+
Sample size:	16,044
