

Bangladesh

Country report card - under-5s

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children under 5. Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/bangladesh-16/>.

Riziko nãírodnã obezity ***7/10** This is a composite â[] obesity riskâ[] score (out of 10, the highest risk) based on obesity prevalence, rate of increase, likelihood of meeting the 2025 target, treatment indicator and childhood stunting levels. Riziko dã[] tská© obezity ***8/11** This is a â[] risk scoreâ[] for each countryâ[] s likelihood of having or acquiring a major childhood obesity problem during the 2020s, taking account of current prevalence levels and risk for future obesity (based on stunting among infants, maternal obesity, maternal smoking, and breastfeeding rates).

* Na zãíkladã[] odhadovanã½ch dat. Dalã½ informace najdete vã sekci Publikace

Prevalence obesity

0-5 years, 2022
