Policies, Interventions and Actions

National Nutrition Policy

The National Nutrition Policy of Belize aims to improve the nutritional status of Belize's population by 2033. This will be done by reducing malnutrition, promoting healthy eating habits, and forming a multi-sectoral approach to ensure access to safe and nutritious food. Strategies include implementing and strengthening a nutritional surveillance system that includes overweight and obesity and capacity building for nutritional services and programmes.

Too Much Junk

In May 2018, the HCC launched the CSO Regional Action Team for Childhood Obesity Prevention including key members of civil society in eight countries: Antigua and Barbuda, Barbados, the Bahamas, Belize, Grenada, Jamaica, St Lucia, and St Kitts Nevis. Together, these organisations have shared materials and best practices in an effort to increase the public awareness around Childhood Obesity and its prevention and to garner thousands of signatures of support for the policies proposed in the HCC's Call to Action at www.toomuchjunk.org.

Belize national plan of action: for prevention and control of non-communicable diseases 2013-2023

The Belize National Plan of Action for the Prevention and Control of Non communicable Diseases (NCDs) 2013-2023 (NCDs) aims to reduce the premature mortality caused by the four major NCDs (cardiovascular diseases, cancer, diabetes and lung disease) by 25% by 2023. This will be achieved through policy and advocacy; health promotion and risk factor reduction of the four common risk factors (tobacco, alcohol, unhealthy diet, physical inactivity); improving disease management and patient self-management; and strengthening surveillance, monitoring

Food-based dietary guidelines for Belize

A National Food Based Dietary Guideline (FBDG) is an important educational tool that converts scientific information on nutritional requirements and food composition into simple, population based language. The guidelines provide technical advice about ways to improve diets and health in a manner that is easy for the public to understand. It should be noted that the guidelines are developed for the general healthy population from two years of age upwards and can be used by health care providers, policy makers, community leaders, educators and the public at large.
