## Policies, Interventions and Actions

### Commercial Determinants of Noncommunicable Diseases in the WHO European Region

This report highlights the substantial impact of commercial determinants on noncommunicable diseases (NCDs) in the WHO European Region. Nearly 7500 deaths per day in the Region are attributed to commercial determinants, such as tobacco, alcohol, processed food, fossil fuels and occupational practices. These commercial products and practices contribute to 25% of all deaths in the Region. The report's chapters systematically explore various facets of how commercial interests exacerbate NCDs and key strategies used by commercial actors to negatively influence NCD-related policies at the national and international level. The report also provides selected case studies from the Region to illustrate key strategies and outcomes of industry influence on health policies. The report then calls for urgent and coordinated action to address the commercial determinants of NCDs. It advocates for building coalitions based on the values of equity, sustainability, and resilience. Public health actors are urged to develop competencies in economic and legal frameworks, enforce transparency, and manage conflicts of interest effectively. The report underscores the need for robust financial reforms and strict regulation to curb industry power and protect public health. By implementing these strategies, the Region can accelerate progress towards global NCD targets and Sustainable Development Goals by 2030.

## European practical and patient-centred guidelines for adult obesity management in primary care

This article aims to provide obesity management guidelines specifically tailored to GPs, favouring a practical patient-centred approach. The focus is on GP communication and motivational interviewing as well as on therapeutic patient education. The new guidelines highlight the importance of avoiding stigmatization, something frequently seen in different health care settings. In addition, managing the psychological aspects of the disease, such as improving self-esteem, body image and quality of life must not be neglected.

## Nutrition Friendly Schools

Under the project “Nutrition Friendly Schools”, UNICEF organized workshops with students, parents, and teaching staff in four primary schools in November and December (two in Sarajevo and two in Banja Luka). The goal of the program, being implemented under the slogan “Eat Well, Grow Well”, is the promotion of health and healthy habits in the nutrition of children of pre-school and school age. In the first phase of the project, since 2011, UNICEF has implemented workshops with pre-school children, while at this stage the focus is on children enrolled in the first grade of primary schools. During the workshops, children develop skills and learn through game, adapted to their age, which food groups are necessary in everyday nutrition, and how to prepare a healthy meal in a creative way and bring it to school. Within the program, parents and teachers also learn about the importance of healthy eating habits, in a way adapted to them.

## Eat Well, Grow Well

The programme Eat Well, Grow Well promoted healthy eating and healthy lifestyles among children, parents, educators, cooks and other employees of preschool institutions in order to reduce obesity and other disorders in the development of preschool children caused by improper diet and unhealthy lifestyles. The programme was coordinated by the Federal Ministry of Education and Science, in cooperation with the Federal Ministry of Health, Institute of Public Health, the Association of Chefs, and the NGO Project Hope Bosnia and Herzegovina.

## Md.net project (Interreg)

Project challenges the problems of currently neglected and undeveloped opportunities of the Mediterranean Diet. The main objective of the project is to strengthen exploration of the Mediterranean Diet according to the UNESCO Med Diet Convention, blending comprehensive Mediterranean Diet concepts with innovative tools. The project will use both traditional and creative measures (as sharing economy) starting cooperation of quadruple helix stakeholders in order to lift the MD economy to new quality levels.

## Food-based dietary guidelines - Bosnia and Herzegovina

The guide was developed by the Institute for Public Health, Federation of Bosnia and Herzegovina, in collaboration with the Federal Ministry of Health, the Federal Ministry of Education and non-governmental organizations. The World Health Organization supported the process. The WHO CINDI dietary guide served as a base for the development of the guidelines. They are endorsed by the Federal Ministry of Health. (Available only in Bosnian language)
