

Cyprus

Country report card - children

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children, including adolescents (aged 5 to 18 years). Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/cyprus-53/>.

Contents	Page
Obesity prevalence	3
Overweight/obesity by education	4
Overweight/obesity by age	5
Overweight/obesity by region	6
Overweight/obesity by socio-economic group	8
Double burden of underweight & overweight	10
Insufficient physical activity	11
Prevalence of at least daily carbonated soft drink consumption	13
Mental health - depression disorders	15
Mental health - anxiety disorders	18

Obesity prevalence

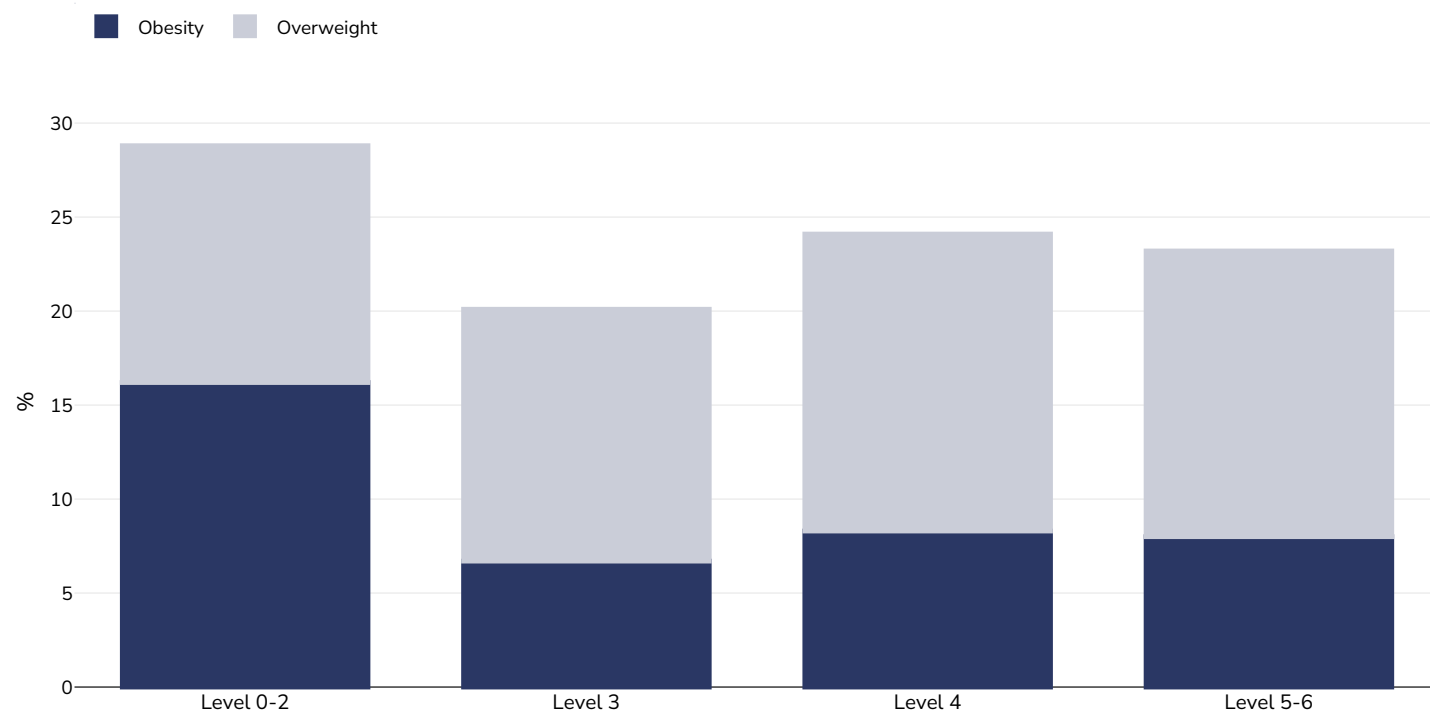

Children, 2022-2024

Survey type:	Measured
Age:	9
Area covered:	National
References:	WHO European Childhood Obesity Surveillance Initiative (COSI): A brief review of results from round 6 of COSI (2022-2024). Copenhagen: WHO Regional Office for Europe; 2024. Licence: CC BY-NC-SA 3.0 IGO.
Cutoffs:	WHO 2007

Overweight/obesity by education

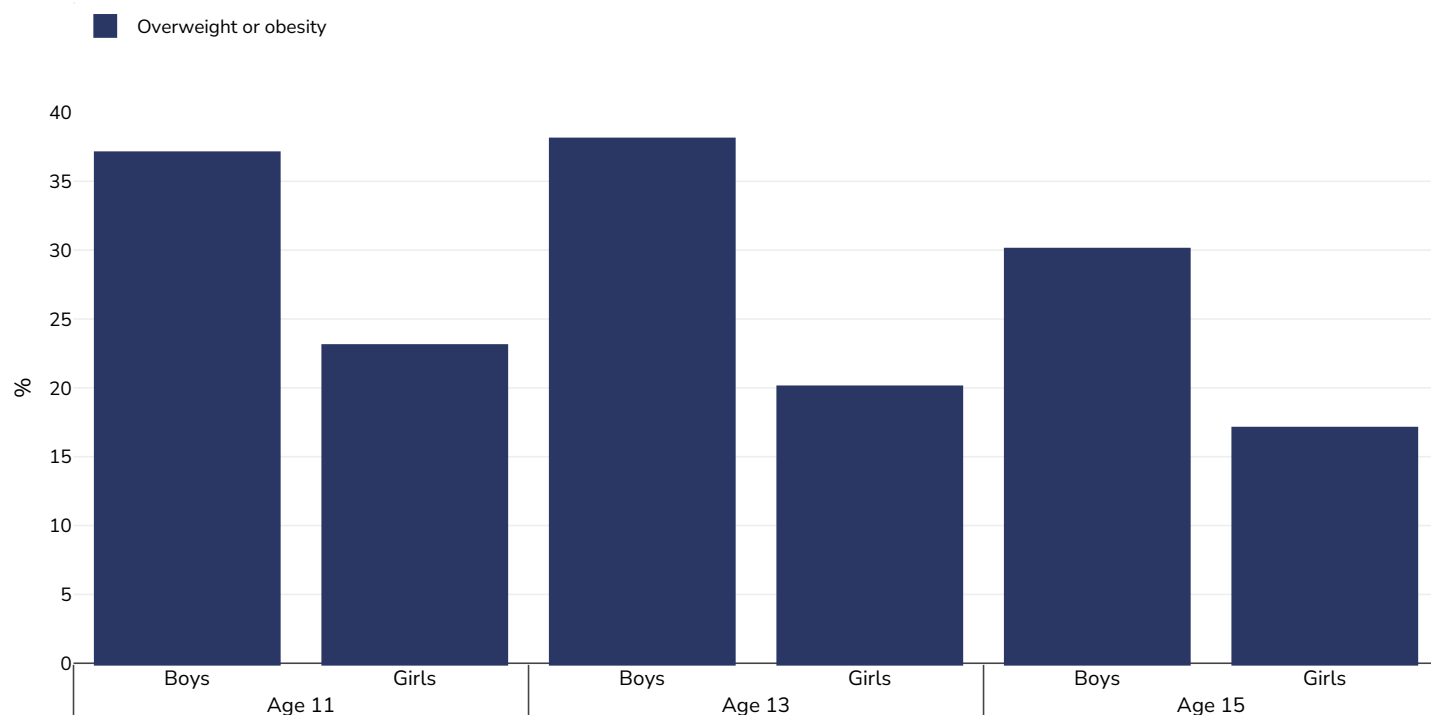

Children, 2007-2008

Survey type:	Measured
Age:	2-9
Sample size:	2942
Area covered:	National
References:	Ahrens W, Pigeot I, Pohlabeln H et al. Prevalence of overweight and obesity in European children below the age of 10. IJO 2014;38:S99-S107
Cutoffs:	IOTF

Overweight/obesity by age

Children, 2021-2022

Survey type: Self-reported

Area covered: See Report

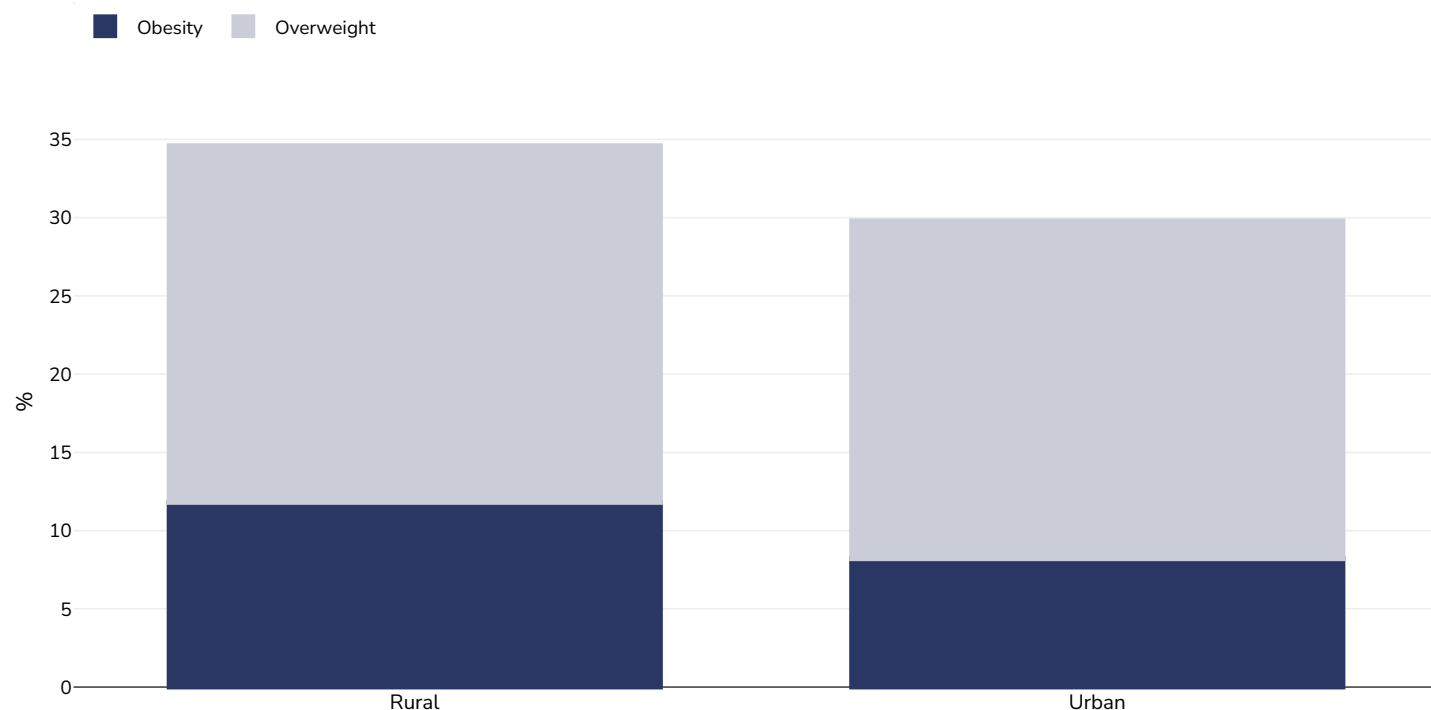

References: Rakić JG, Hamrik Z, Dzielska A, Felder-Puig R, Oja L, Bakalár P et al. A focus on adolescent physical activity, eating behaviours, weight status and body image in Europe, central Asia and Canada. Health Behaviour in School-aged Children (HBSC) international report from the 2021/2022 survey. Volume 4. Copenhagen: WHO Regional Office for Europe; 2024. 'Any translation was not created by the World Health Organization (WHO). WHO is not responsible for the content or accuracy of this translation. The original English edition shall be the binding and authentic edition'

Notes: HBSC aims to survey approximately 1500 pupils per age group in each country or region (totaling around 4500)

Cutoffs: +2SD

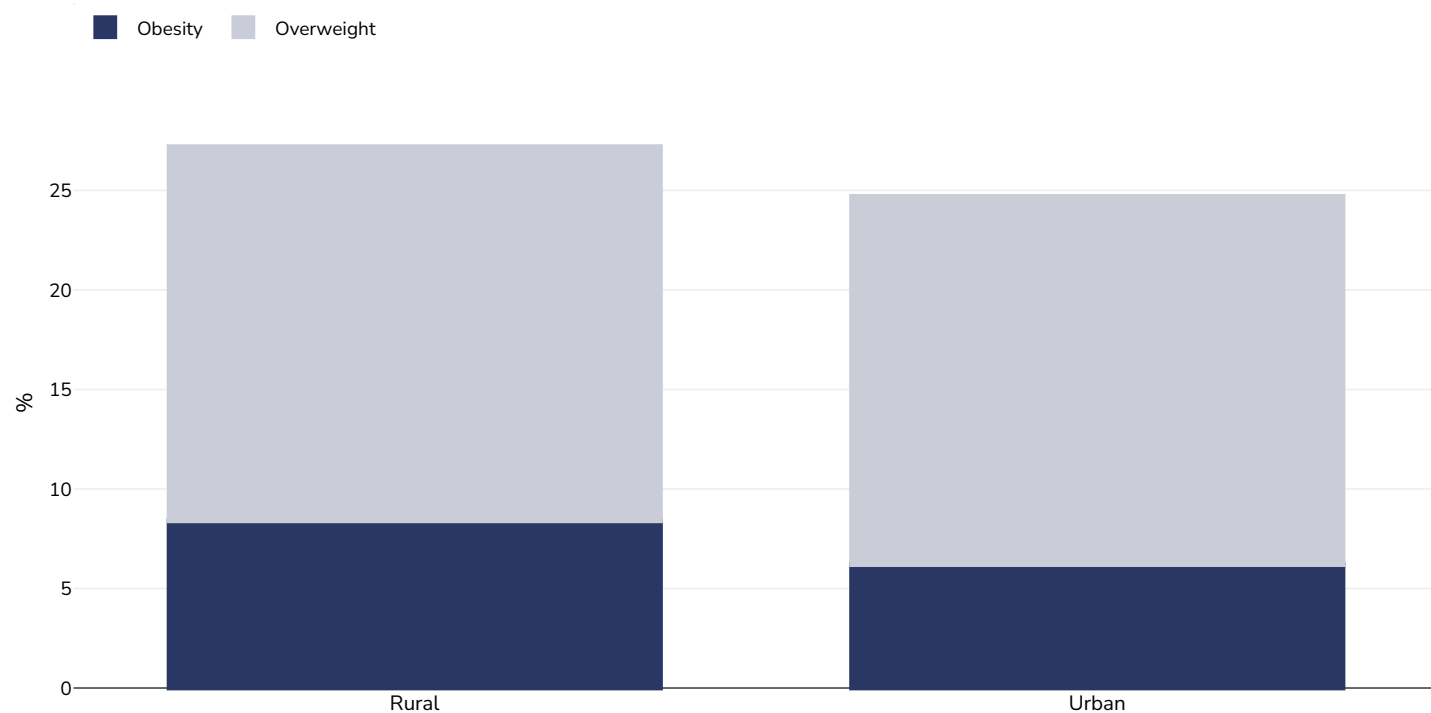

Overweight/obesity by region

Boys, 2009-2010

Survey type:	Measured
Age:	6-17
Sample size:	3090
Area covered:	National
References:	Savva SC, Kouridesa YA, Hadjigeorgioua C, Tornaritis MJ. Overweight and obesity prevalence and trends in children and adolescents in Cyprus 2000-2010. Obesity Research & Clinical Practice (2014) 8, e426-434
Cutoffs:	IOTF

Girls, 2009-2010

Survey type:	Measured
Age:	6-17
Sample size:	3090
Area covered:	National
References:	Savva SC, Kouridesa YA, Hadjigeorgioua C, Tornaritis MJ. Overweight and obesity prevalence and trends in children and adolescents in Cyprus 2000-2010. Obesity Research & Clinical Practice (2014) 8, e426-434
Cutoffs:	IOTF

Overweight/obesity by socio-economic group

Boys, 2021-2022

Survey type:	Self-reported
Age:	11-15
References:	Raki? JG, Hamrik Z, Dzielska A, Felder-Puig R, Oja L, Bakalár P et al. A focus on adolescent physical activity, eating behaviours, weight status and body image in Europe, central Asia and Canada. Double burden of underweight & overweight

Children, 2022

Survey type:	Measured
Age:	5-19
References:	NCD Risk Factor Collaboration (NCD-RisC). Worldwide trends in underweight and obesity from 1990 to 2022: a pooled analysis of 3663 population representative studies with 222 million children, adolescents, and adults. Lancet 2024; published online Feb 29. https://doi.org/10.1016/S0140-6736(23)02750-2 .
Notes:	Age standardised estimates
Definitions:	Combined prevalence of BMI < -2SD and BMI > 2SD (double burden of thinness and obesity)
Cutoffs:	BMI < -2SD and BMI > 2SD

Insufficient physical activity

Boys, 2022

References: Rakić JG, Hamrik Z, Dzielska A, Felder-Puig R, Oja L, Bakalár P et al. A focus on adolescent physical activity, eating behaviours, weight status and body image in Europe, central Asia and Canada. Health Behaviour in School-aged Children international report from the 2021/2022 survey. Volume 4. Copenhagen: WHO Regional Office for Europe; 2024. Licence: CC BY-NC-SA 3.0 IGO. Health Behaviour in School-aged Children study (2023), Data browser (findings from the 2021/22 international HBSC survey): <https://data-browser.hbsc.org>.

Notes: Young people were asked to report the number of days over the past week during which they were physically active for a total of at least 60 minutes. The question was introduced by text defining moderate-to-vigorous physical activity (MVPA) as any activity that increases the heart rate and makes the person get out of breath some of the time, with examples provided. Findings presented on the Observatory show the proportions who report less than 60 minutes of MVPA daily.

Definitions: % reporting less than 60 minutes of MVPA daily

Girls, 2022
