School Fruit, Vegetables and Milk Scheme

"Applicable since 1 August 2017, the EU school fruit, vegetables and milk scheme combines two previous schemes (the school fruit and vegetables scheme and the school milk scheme) under a single legal framework for more efficiency and an enhanced focus on health and educational. The scheme supports the distribution of products, educational measures and information measures. The scheme supports the distribution of fruit, vegetables, milk and certain milk products to schoolchildren, from nursery to secondary school. EU countries approve a list of products (in collaboration with their health and nutrition authorities) which will help achieve the schemes objective of helping children to follow a healthy diet. Priority is for fresh fruit and vegetables and for plain milk. In order to support a varied diet and/or specific nutritional needs, EU countries may also make processed fruit and vegetables such as juices and soups and certain milk products such as yoghurt and cheese, available. Additionally, under stricter conditions, milk-based drinks may be included." - EU Commission

Healthy Stadia Network

"At Healthy Stadia, we encourage professional and amateur sports clubs, league operators, national and international governing bodies of sport to develop their stadia and sports facilities as health-promoting environments. We do this by supporting them to adopt a range of policies and practices in support of the health of their fans, their staff and the surrounding community. The definition we give to Healthy Stadia is: Healthy Stadia are... those who promote the health of visitors, fans, players, employees and the surrounding community... places where people can go to have a positive, healthy experience playing or watching sport."

EU health and nutrient claims regulation

Regulation n° 1924/2006 establishes EU-wide rules on the use of specified health and nutrient claims. The European Commission approves claims provided they are based on scientific evidence and accessible consumers. The European Food Safety Authority is responsible for evaluating the scientific evidence supporting health claims. Nutrition claims may only be used on food defined as "healthy" by a nutrient profile.
