

Haiti

Country report card - under-5s

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children under 5. Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/haiti-90/>.

Az elh   s kock  zata nemzeti szinten *9/10 This is a composite     obesity risk    score (out of 10, the highest risk) based on obesity prevalence, rate of increase, likelihood of meeting the 2025 target, treatment indicator and childhood stunting levels. A gyermekkori elh   s kock  zata *7/11 This is a     risk score    for each country    s likelihood of having or acquiring a major childhood obesity problem during the 2020s, taking account of current prevalence levels and risk for future obesity (based on stunting among infants, maternal obesity, maternal smoking, and breastfeeding rates).

* Becs  lt adatok alapj  n. Tov  bbi inform  ci  t a kiadv  nyokban tekinthet meg

Az elhÃzÃjs elÃ fordulÃsa

0-5 years, 2016-2017

Ã letkor:	0-5
Minta nagysÃga:	6589
ReferenciÃk:	DHS: EnquÃte MortalitÃ, MorbiditÃ et Utilisation des Services (EMMUS-VI 2016-2017) PÃtion-Ville, HaÃti, et Rockville, Maryland, USA : IHE et ICF

Jegyzetek:

UNICEF/WHO/World Bank Joint Child Malnutrition Estimates Expanded Database: Overweight (Survey Estimates), May 2023, New York. For more information about the methodology, please consult <https://data.unicef.org/resources/jme-2023-country-consultations/> Percentage of children under 5 years of age falling above 2 standard deviations (moderate and severe) from the median weight-for-height of the reference population.
