Country report card - children

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children, including adolescents (aged 5 to 18 years). Where available, data on common and relevant obesity drivers and comorbidities are also presented.

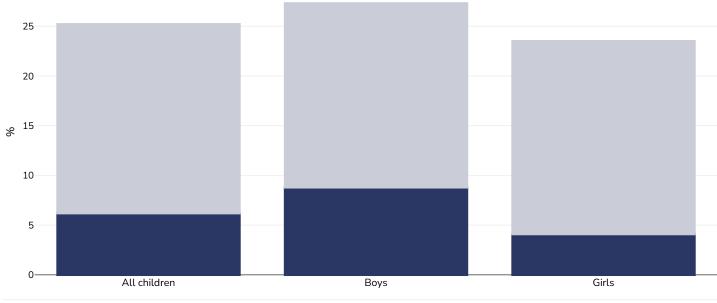

Contents	Page
Obesity prevalence	3
Double burden of underweight & overweight	4
Insufficient physical activity	5
Average daily frequency of carbonated soft drink consumption	12
Prevalence of less than daily fruit consumption	13
Prevalence of less than daily vegetable consumption	16
Average weekly frequency of fast food consumption	19
Mental health - depression disorders	20
Mental health - anxiety disorders	24

Obesity prevalence

Children, 2013-2014

Survey type:	Measured
Age:	15-18
Sample size:	410
Area covered:	Regional
References:	Musaiger A.O et al. 2016. Prevalence of overweight and obesity among adolescents in eight Arab countries: comparison between two international standards (ARABEAT-2). Nutr Hosp. 33(5). pp. 1062-1065.
Notes:	Region: Mosel
Cutoffs:	IOTF

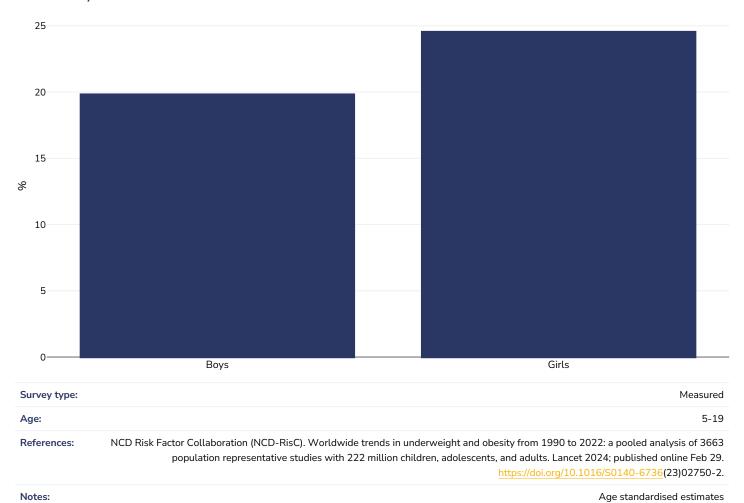

Double burden of underweight & overweight

Children, 2022

Definitions:

Cutoffs:

Combined prevalence of BMI < -2SD and BMI > 2SD (double burden of thinness and obesity)

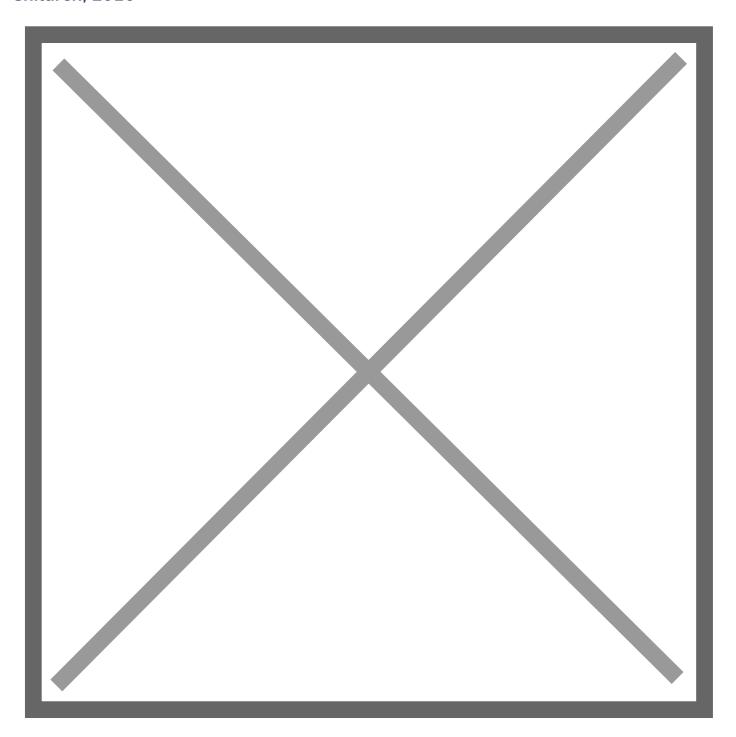

BMI < -2SD and BMI > 2SD

Insufficient physical activity

Children, 2016

Survey type:	Self-reported
Age:	11-17
References:	Global Health Observatory data repository, World Health Organisation, https://apps.who.int/gho/data/node.main.A893ADO?lang=en (last accessed 16.03.21)
Notes:	% of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.
