

Jamaica

Policies, Interventions and Actions

National School Nutrition Standards

These Standards define the types of foods and beverages restricted in the Jamaican school environment. The Standards apply to all food and drink items available to children within the school environment whether prepared on or offsite. In addition, these Standards apply to the compound and immediate vicinity (within 200 m from the perimeter) of all public infant, primary and secondary institutions in Jamaica and are also applicable to school fundraisers, recreational activities, sporting events and competitions at those schools. Prohibitions on marketing in the school environment, such as promotion, sponsorship and philanthropic activities linked to brands associated with products which are high in salt, fat or sugar are recommended in these Standards

Too Much Junk

In May 2018, the HCC launched the CSO Regional Action Team for Childhood Obesity Prevention including key members of civil society in eight countries: Antigua and Barbuda, Barbados, the Bahamas, Belize, Grenada, Jamaica, St Lucia, and St Kitts Nevis. Together, these organisations have shared materials and best practices in an effort to increase the public awareness around Childhood Obesity and its prevention and to garner thousands of signatures of support for the policies proposed in the HCC's Call to Action at www.toomuchjunk.org.

PAHO Plan of Action for the Prevention of Obesity in Children and Adolescents

The plan calls for the implementation of fiscal policies, regulation of food marketing and labelling, improvement of school nutrition and physical activity environments, and promotion of breastfeeding and healthy eating. Each Member State is encouraged to implement policies and regulations proposed in this Plan of Action according to its national needs and objectives.

Food Based Dietary Guidelines for Jamaicans

The National Food Based Dietary Guidelines were launched in March 2015 to help prevent the onset of chronic non-communicable diseases (NCDs) such as hypertension, diabetes, cardiovascular diseases and strokes. The eight (8) Food Based Dietary Guidelines are aimed at promoting healthy behaviours and practices that will help the population aged 2 years and older to make healthy food choices and be physically active.
