## Health systems

Economic classification: **Lower Middle Income**

### Health systems summary

Kenya has a devolved healthcare system that can be split into three subsystems; the public sector, the commercial private sector and the faith-based sector. Most Kenyans receive healthcare from the underfunded public sector that has suffered in recent years from successive nurse and doctor strikes, a shortage of health workers and corruption. There is a mandatory national hospital insurance fund for formal sector workers that is optional for informal workers.

Currently, healthcare is financed through a combination of insurance, government funding, donor funding and out of pocket (OOP) payments. Both public and private facilities charge user fees with some exceptions such as certain facilities and age groups. It is estimated that OOP payments by individuals and donor funding make up 26.1% and 23.4% of total health expenditure respectively, indicating a precarious financial situation that offers inadequate financial protection. Kenya has committed to reforming its health financing by 2022 in order to achieve universal health coverage.

### Indicators

Where is the country's government in the journey towards defining 'Obesity as a disease'?	No
Where is the country's healthcare provider in the journey towards defining 'Obesity as a disease'?	No
Is there specialist training available dedicated to the training of health professionals to prevent, diagnose, treat and manage obesity?	No
Have any taxes or subsidies been put in place to protect/assist/inform the population around obesity?	No
Are there adequate numbers of trained health professionals in specialties relevant to obesity in urban areas?	No
Are there adequate numbers of trained health professionals in specialties relevant to obesity in rural areas?	No
Are there any obesity-specific recommendations or guidelines published for adults?	Not known
Are there any obesity-specific recommendations or guidelines published for children?	Not known
In practice, how is obesity treatment largely funded?	Out of pocket

## Perceived barriers to treatment

Lack of political will, interest and action	Obesity not recognised as a disease	Lack of financial investment and funding for coverage	Cultural norms and traditions
Lack of training for healthcare professionals	Healthcare professionals disinterested in obesity	Poor health literacy and behaviour	Social determinants of health
Obesogenic environment	Lack of evidence, monitoring and research		

## Summary of stakeholder feedback

Obesity is not yet considered to be a disease in Kenya. Rather, it is considered a lifestyle condition and by some, a symbol of wealth and success to be celebrated. Stakeholders reported that obesity is not yet a priority as a result of these perceptions and the continued challenges of communicable diseases. It is noted that there are some positive developments however, such as the development of healthy food guidelines for children and the training and deployment of nutritionists.

It appears that obesity is only treated when comorbidities and complications have developed. Any treatment received is then paid for out of pocket by the individuals, typically in the private sector. Overall, treatment options are limited in urban areas, and are even worse in rural areas. In the few instances where one living with obesity enters the health system, they tend to leave the system with their obesity unaddressed because of the lack of obesity-specific care pathways and policies.

Stakeholders stressed that there are inadequate numbers of obesity specialists in both urban and rural areas. There is no specialist obesity training available, but it appears that there is also a lack of general training available. This lack of training contributes to the high numbers of individuals leaving the system with their obesity untreated.

There were conflicting responses on the presence of obesity management guidelines. One stakeholder reported that a set had been developed but were poorly disseminated. Others were not aware of the existence of any guidelines.
