Obesity prevalence

Adults, 2022

Survey type: Measured
Age: 20-49
Sample size: 7117
Area covered: National

Notes: 5750 Women and 1367 Men NB. Combined adult data estimated. These estimates were calculated by weighting male and female survey results. Weighting based on World Bank Population % total female 2020 (https://data.worldbank.org/indicator/SP.POP.TOTL.FE.ZS - accessed 06.07.23)

Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m², obesity refers to a BMI greater than 30kg/m².
Girls, 2022

Survey type: Measured
Age: 15-19
Sample size: 1230
Area covered: National

Cutoffs: WHO 2007
% Adults living with obesity, 1996-2016

Survey type: Measured

References: For full details of references visit https://data.worldobesity.org/

Notes: Adults aged 15-49

Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m², obesity refers to a BMI greater than 30kg/m².

Different methodologies may have been used to collect this data and so data from different surveys may not be strictly comparable. Please check with original data sources for methodologies used.
% Adults living with overweight or obesity, 1996-2016

Overweight/obesity by age

Adults, 2022

Survey type: Measured
Sample size: 7117
Area covered: National

Notes: 5750 Women and 1367 Men

Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m², obesity refers to a BMI greater than 30kg/m².
Survey type: Measured
Sample size: 575
Area covered: Urban
Notes: A cross-sectional survey was conducted from May to October of 2017. Behavioral data were collected using a structured self-administered questionnaire with parents of children aged 6–13 years old in grades 1–5 studying in private schools of Lalitpur district in Nepal. Children with amputated body parts, or any acute or chronic health condition were excluded from the study as these conditions could affect their body weight. Those staying in a hostel away from their parents were also excluded as the questionnaire had to be filled out by a parent.
Cutoffs: BMI-for-age-sex was calculated using WHO AnthroPlus
