## Supreme Decree No. 033-2016-SA (the process of gradual reduction until the elimination of trans fats)

Measures to limit or virtually eliminate industrially-produced trans fatty acids in food intended for the final consumer and/or for supply to retail. All natural and legal persons who market, import, supply and manufacture processed food and non-alcoholic beverages shall gradually adjust the elimination of the trans fat content according to the following parameters and deadlines: 6.1.- Within a period of up to 18 months from the entry into force of the Regulation, the use and/or content of trans fats shall not exceed: (a) Fats, vegetable oils and margarines: 2 g of trans fatty acids per 100 g or 100 ml of fat b) Other industrially processed food and non-alcoholic beverages: 5 g of trans fatty acids per 100 g or 100 ml of fat 6.2.- For the purposes of eliminating the use and / or content of trans fat, it is established that within a period of 54 months, counted from the validity of this Regulation, the use and content of trans fats that come from partial hydrogenation in any food and processed non-alcoholic beverage will be eliminated. 6.3.- In the case of products containing trans fats of technological origin other than partial hydrogenation, the Health Authority at the national level will only grant the corresponding authorization, provided that it is demonstrated based on scientific and technological evidence, that the trans fat content has been reduced to the maximum possible in accordance with the technology used for its processing and there is no technological substitution for total elimination, the limit of trans fat content may not be exceeded: 2g of trans fatty acids per 100g or 100 ml of fat, exceptionally, in order to allow their gradual elimination in accordance with technological progress. (Available only in Spanish language)
