

# Filipiinid

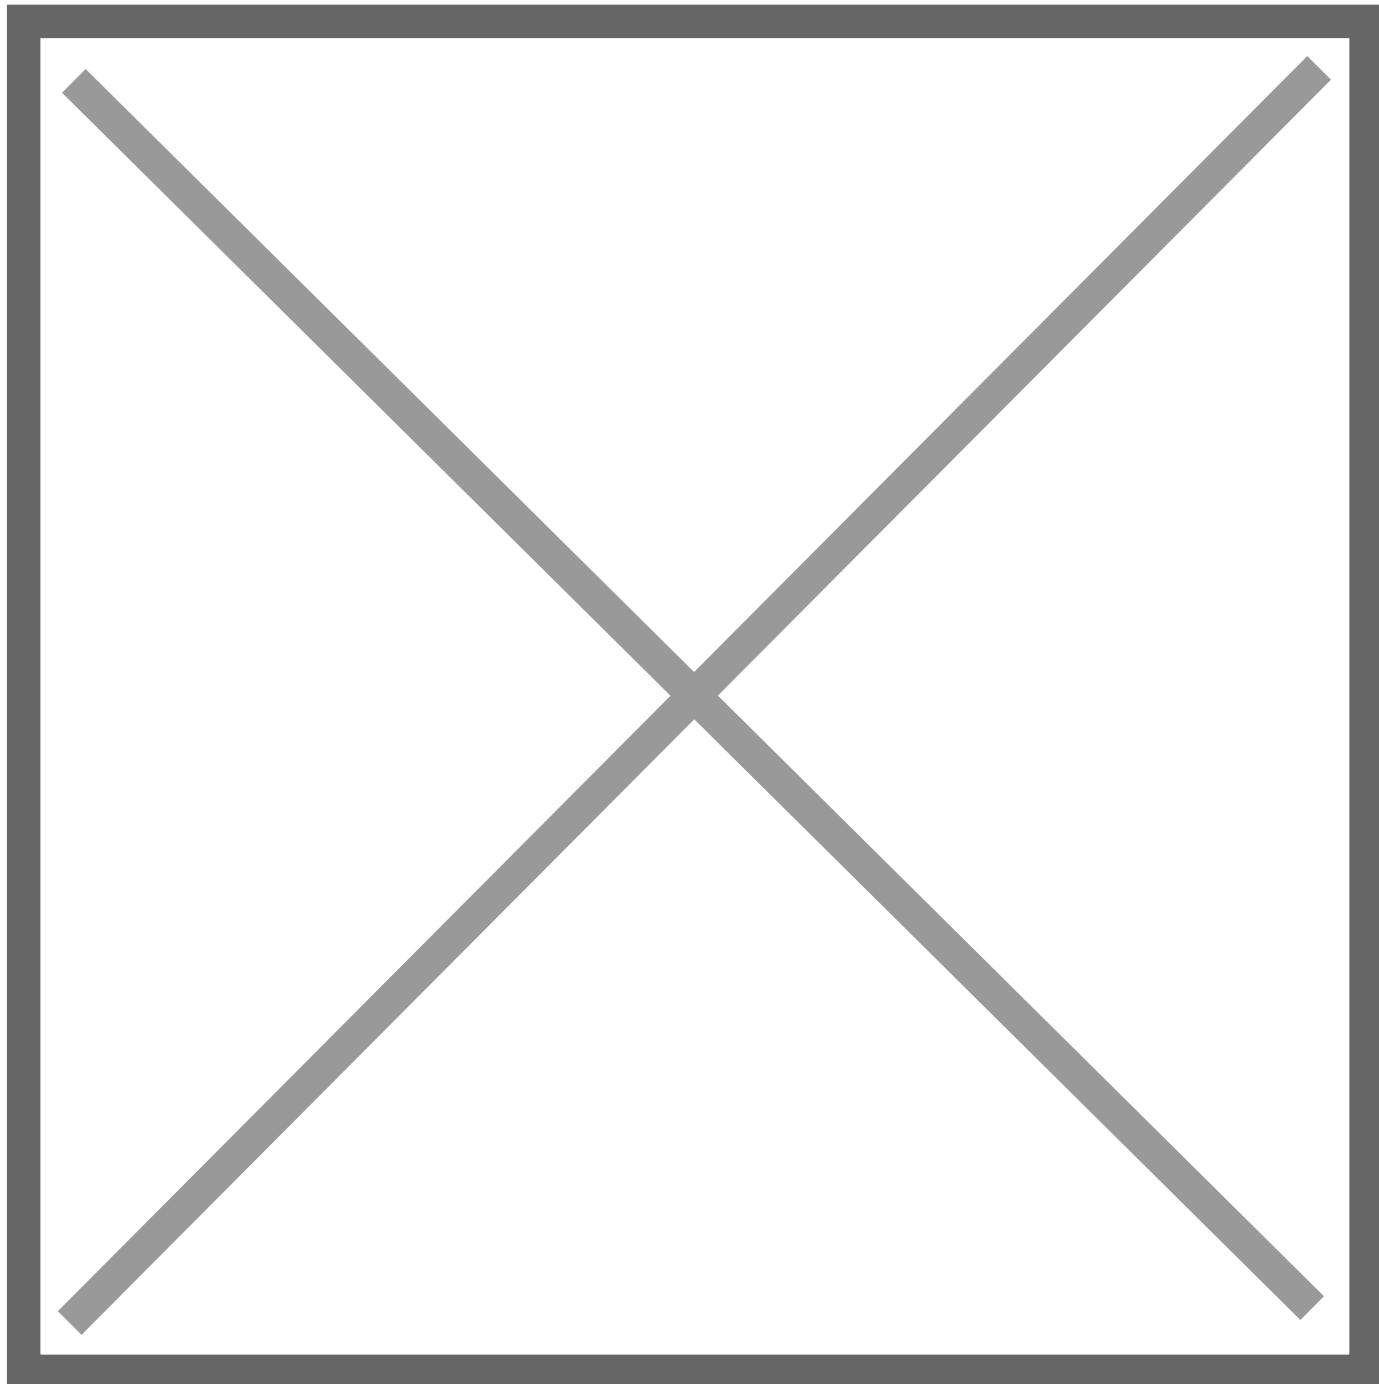

## Country report card - children

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children, including adolescents (aged 5 to 18 years). Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/philippines-172/>

Riiklik rasvumisrisk \***6/10**This is a composite â€œ obesity riskâ€ score (out of 10, the highest risk) based on obesity prevalence, rate of increase, likelihood of meeting the 2025 target, treatment indicator and childhood stunting levels.Laste rasvumise oht \***5/11**This is a â€œ risk scoreâ€ for each countryâ€™s likelihood of having or acquiring a major childhood obesity problem during the 2020s, taking account of current prevalence levels and risk for future obesity (based on stunting among infants, maternal obesity, maternal smoking, and breastfeeding rates).

\* PÄuhineb hinnangulitel andmetel. Lisateavet leiate jaotisest â€œ VÄxlijaandedâ€
