## Country report card

*This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity . Where available, data on common and relevant obesity drivers and comorbidities are also presented.*

*View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/qatar-176/>.*

| Contents                                                     | Page |
|--------------------------------------------------------------|------|
| Obesity prevalence                                           | 3    |
| Overweight/obesity by education                              | 6    |
| Overweight/obesity by age                                    | 8    |
| Double burden of underweight & overweight                    | 10   |
| Insufficient physical activity                               | 12   |
| Average daily frequency of carbonated soft drink consumption | 18   |
| Estimated per capita fruit intake                            | 19   |
| Prevalence of less than daily fruit consumption              | 20   |
| Prevalence of less than daily vegetable consumption          | 21   |
| Average weekly frequency of fast food consumption            | 22   |
| Estimated per-capita processed meat intake                   | 23   |
| Estimated per capita whole grains intake                     | 24   |
| Mental health - depression disorders                         | 25   |
| Mental health - anxiety disorders                            | 31   |
| % Infants exclusively breastfed 0-5 months                   | 36   |
| Percent of population who cannot afford a healthy diet       | 37   |
| Oesophageal cancer                                           | 38   |
| Breast cancer                                                | 40   |
| Colorectal cancer                                            | 41   |
| Pancreatic cancer                                            | 43   |
| Gallbladder cancer                                           | 45   |
| Kidney cancer                                                | 47   |
| Cancer of the uterus                                         | 49   |
| Raised blood pressure                                        | 50   |
| Raised cholesterol                                           | 53   |
| Raised fasting blood glucose                                 | 56   |
| Diabetes prevalence                                          | 58   |
| Ovarian Cancer                                               | 59   |
| Leukemia                                                     | 60   |
| Liver and intrahepatic bile duct Cancer                      | 62   |
| Multiple Myeloma                                             | 64   |
| Non Hodgkin Lymphoma                                         | 66   |
| Thyroid Cancer                                               | 68   |

## Obesity prevalence

### Adults, 2012

|               |                                                                                                                                                                                                                                |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Survey type:  | Measured                                                                                                                                                                                                                       |
| Age:          | 18-64                                                                                                                                                                                                                          |
| Sample size:  | 2384                                                                                                                                                                                                                           |
| Area covered: | National                                                                                                                                                                                                                       |

## Insufficient physical activity

Adults, 2022

Survey type: Self-reported

Age: 18+

Area covered: National

References: WHO (2024). Prevalence of insufficient physical activity among adults aged 18-years age-standardized estimate in 2022. Available at [https://www.who.int/data/gho/data/indicators/indicator-details/GHO/prevalence-of-insufficient-physical-activity-among-adults-aged-18-years-\(age-standardized-estimate\)-\(-\)](https://www.who.int/data/gho/data/indicators/indicator-details/GHO/prevalence-of-insufficient-physical-activity-among-adults-aged-18-years-(age-standardized-estimate)-(-))

Definitions: Percent of population attaining less than 150 minutes of moderate-intensity physical activity per week, or less than 75 minutes of vigorous-intensity physical activity per week, or equivalent.

## Men, 2022

Survey type: Self-reported

Age: 18+

Area covered: National

References: WHO (2024). Prevalence of insufficient physical activity among adults aged 18-years age-standardized estimate in 2022. Available at [https://www.who.int/data/gho/data/indicators/indicator-details/GHO/prevalence-of-insufficient-physical-activity-among-adults-aged-18-years-\(age-standardized-estimate\)-\(-\)](https://www.who.int/data/gho/data/indicators/indicator-details/GHO/prevalence-of-insufficient-physical-activity-among-adults-aged-18-years-(age-standardized-estimate)-(-))

Definitions: Percent of population attaining less than 150 minutes of moderate-intensity physical activity per week, or less than 75 minutes of vigorous-intensity physical activity per week, or equivalent.

## Women, 2022

Survey type: Self-reported

Age: 18+

Area covered: National

References: WHO (2024). Prevalence of insufficient physical activity among adults aged 18-years age-standardized estimate in 2022. Definitions: Percent of population attaining less than 150 minutes of moderate-intensity physical activity per week, or less than 75 minutes of vigorous-intensity physical activity per week, or equivalent.

## Children, 2016

**Survey type:** Self-reported

**Age:** 11-17

**References:** Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en> (last accessed 16.03.21)

**Notes:** % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

**Definitions:** % Adolescents insufficiently active (age standardised estimate)

## Boys, 2016

**Survey type:** Self-reported

**Age:** 11-17

**References:** Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en> (last accessed 16.03.21)

**Notes:** % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

**Definitions:** % Adolescents insufficiently active (age standardised estimate)

## Girls, 2016

**Survey type:** Self-reported

**Age:** 11-17

**References:** Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en> (last accessed 16.03.21)

**Notes:** % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

**Definitions:** % Adolescents insufficiently active (age standardised estimate)

## Average daily frequency of carbonated soft drink consumption

### Children, 2009-2015

Survey type: Measured

Age: 12-17

References: Beal et al. (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287> sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

## Estimated per capita fruit intake

Adults, 2017

Survey type: Measured

Age: 25+

References: Global Burden of Disease, the Institute for Health Metrics and Evaluation <http://ghdx.healthdata.org/>

Definitions: Estimated per-capita fruit intake (g/day)

## Prevalence of less than daily fruit consumption

Children, 2008-2015

Survey type: Measured

Age: 12-17

References: Global School-based Student Health Surveys. Beal et al (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287>. Sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

Definitions: Prevalence of less-than-daily fruit consumption (% less-than-daily fruit consumption)

## Prevalence of less than daily vegetable consumption

### Children, 2008-2015

Survey type: Measured

Age: 12-17

References: Beal et al. (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287> sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

Definitions: Prevalence of less-than-daily vegetable consumption (% less-than-daily vegetable consumption)

## Average weekly frequency of fast food consumption

### Children, 2009-2015

Age:

12-17

**References:**
