

Romania

Country report card - adults

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for adults. Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/romania-178/>.

Rischio nazionale di obesità *7/10 This is a composite "obesity risk" score (out of 10, the highest risk) based on obesity prevalence, rate of increase, likelihood of meeting the 2025 target, treatment indicator and childhood stunting levels.

Rischio di obesità infantile *7/11 This is a "risk score" for each country's likelihood of having or acquiring a major childhood obesity problem during the 2020s, taking account of current prevalence levels and risk for future obesity (based on stunting among infants, maternal obesity, maternal smoking, and breastfeeding rates).

*Sulla base di dati stimati. Per maggiori informazioni consultare le Pubblicazioni

Prevalenza dell'obesità

Adulti, 2022

Tipo di
sondaggio:

Auto-riferito

Età :

16+

Area coperta:

Nazionale

Riferimenti: Eurostat 2022 Data. Available at https://ec.europa.eu/eurostat/databrowser/view/ilc_hch10/default/table?lang=en (last accessed 19.03.25)

Note (disponibile solo in inglese): EUROSTAT 2022 data derived from EU statistics on income and living conditions (EU-SILC) survey which includes adults aged 16+ years. This differs from most EUROSTAT data which is derived from the Health Interview Surveys, which includes adults aged 15+ years (though sometimes only data from adults aged 18+ reported)

Salvo diversa indicazione, il sovrappeso si riferisce a un BMI compreso tra 25 kg e 29,9 kg/m², l'obesità si riferisce a un BMI superiore a 30 kg/m².
