

Saudi Arabia

Policies, Interventions and Actions

Obesity Control & Prevention Strategy 2020-2030

The purpose of the Strategy is to inform the coordination and implementation of a holistic response to improve health outcomes related to obesity in the Kingdom. It aligns current data, strategies, programs, and needs and identifies a leadership framework to guide implementation of a strategic and coordinated response.

Trans-fat policy

In January 2020, Saudi Arabia became the first country in the Eastern Mediterranean Region and the 14th country in the world to implement a best-practice TFA policy. The SFDA started with a regulation for mandatory labelling of TFA, which was passed in June 2015 and came into effect in 2016. In November 2015, a regulation was passed for a TFA limit of 2% in oils and fats, and 5% in other food products. These TFA limits were approved by the GCC Standardization Organization (GSO) and became available for other GCC Member States to adopt in 2015.¹⁰ The limit took effect in Saudi Arabia in November 2017. In January 2020, Saudi Arabia implemented a second phase of its TFA policy, banning PHO.

Front of Pack Nutritional Labeling (SFDA.FD 42/2018)

The Saudi Food & Drug Authority recommended the traffic light system standard to be used as Front of Pack Nutrition Labeling in 2018. The system is adapted from the UK traffic light system, and uses the UK's thresholds for fat, saturated fat, total sugars, and salt but only on a 100 g/mL basis. Following feedback from local industry and trading partners, SFDA decided to make this FOPNL scheme voluntary initially. It is due to become mandatory in 2021.

Gulf Technical Regulation: Labeling of prepackaged food stuffs

Gulf Cooperation Council countries namely adopted the standards GSO (09/2013) Amd 2016 and GSO (150-2/2013) for labeling of pre-packaged foods and shelf life. According to this GCC-wide standard, prepackaged food product labels should be in Arabic or include an Arabic language translation of the label. Producers and retailers are also mandated to provide a list of the nutrient content of pre-packaged food products, even in the absence of a nutrition or health claim.

Responsible Food and Beverage Marketing to Children Pledge

The Responsible Food and Beverage Marketing to Children Pledge, initially adopted in the GCC in 2010, is a voluntary commitment by the signatory companies to conduct responsible food and beverage marketing to children. The pledge informs and benchmarks how food and beverage products are marketed in a responsible way to children under the age of 12 in the region. In 2016 the pledge was enhanced by applying a set of nutrition criteria to define 'better for you options' . The pledge was endorsed by the Advertising Business Group in 2018.
