Policies, Interventions and Actions

National Strategic Plan for the Prevention and Control of Non-Communicable Diseases, 2022 – 2027

The plan aims to move South Africa closer to Sustainable Development Goal (SDG) 3.4: To reduce, by one-third, premature mortality from NCDs+ through prevention and treatment and promote mental health and well-being by 2030 through the progressive improvement of wellness and reduction of premature morbidity, disability and mortality from NCDs. Within the plan, there is a deliverable to undertake regular screening and awareness campaigns on obesity among children and adults.

Foodstuffs, Cosmetics and Disinfectants Act (54/1972): Regulations relating to the reduction of sodium in certain foodstuffs and related matters.

In 2013, the South African Department of Health adopted targets for salt reduction in 13 food categories by means of regulation. There was a stepped approach, with food manufacturers given until June 2016 to meet one set of category-based targets and another three years, until June 2019, to meet the next.
