

United Arab Emirates

Country report card - children

This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children, including adolescents (aged 5 to 18 years). Where available, data on common and relevant obesity drivers and comorbidities are also presented.

View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/country/united-arab-emirates-225/>.

Contents	Page
Obesity prevalence	3
Overweight/obesity by age	4
Overweight/obesity by ethnicity	5
Double burden of underweight & overweight	6
Insufficient physical activity	7
Average daily frequency of carbonated soft drink consumption	14
Prevalence of less than daily fruit consumption	15
Prevalence of less than daily vegetable consumption	18
Average weekly frequency of fast food consumption	21
Mental health - depression disorders	22
Mental health - anxiety disorders	26

Obesity prevalence

Children, 2018-2019

Survey type:	Measured
Age:	13-19
Sample size:	932
Area covered:	National
References:	Baniissa W, Radwan H, Rossiter R, et al. Prevalence and determinants of overweight/ obesity among school-aged adolescents in the United Arab Emirates: a crossectional study of private and public schools. BMJ Open 2020;10:e038667. doi:10.1136/ bmjopen-2020-038667
Notes:	Small sample size. Convenience sampling was used to select classes. Students with chronic diseases (eg, type 2 diabetes, cancer and mental health conditions) based on information from students' school records where excluded.
Definitions:	A BMI at or above the 85th percentile for adolescents was adopted to classify participants as either overweight/obese
Cutoffs:	CDC

Overweight/obesity by age

Children, 2014-2015

Survey type:	Measured
Sample size:	27113
Area covered:	Regional
References:	AlBlooshi, A., Shaban, S., AlTunaiji, M., Fares, N., AlShehhi, L., AlShehhi, H., AlMazrouei, A., and Souid, A.-K. (2016) Increasing obesity rates in school children in United Arab Emirates. Obesity Science & Practice, 2: 196–202. doi: 10.1002/osp4.37.
Notes:	International IOTF Cut Off
Cutoffs:	IOTF

Overweight/obesity by ethnicity

Ethnic groups are as defined by publication of origin and are not as defined by WOF. In some instances ethnicity is conflated with nationality and/or race.

Double burden of underweight & overweight

Children, 2022

Survey type:	Measured
Age:	5-19
References:	NCD Risk Factor Collaboration (NCD-RisC). Worldwide trends in underweight and obesity from 1990 to 2022: a pooled analysis of 3663 population representative studies with 222 million children, adolescents, and adults. Lancet 2024; published online Feb 29. https://doi.org/10.1016/S0140-6736(23)02750-2 .
Notes:	Age standardised estimates
Definitions:	Combined prevalence of BMI < -2SD and BMI > 2SD (double burden of thinness and obesity)
Cutoffs:	BMI < -2SD and BMI > 2SD

Insufficient physical activity

Children, 2016

Survey type:	Self-reported
Age:	11-17
References:	Global Health Observatory data repository, World Health Organisation, https://apps.who.int/gho/data/node.main.A893ADO?lang=en (last accessed 16.03.21)
Notes:	% of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions: % Adolescents insufficiently active (age standardised estimate)

Boys, 2016

Survey type:	Self-reported
Age:	11-17
References:	Global Health Observatory data repository, World Health Organisation, https://apps.who.int/gho/data/node.main.A893ADO?lang=en (last accessed 16.03.21)
Notes:	% of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions:

% Adolescents insufficiently active (age standardised estimate)

Girls, 2016

Survey type:	Self-reported
Age:	11-17
References:	Global Health Observatory data repository, World Health Organisation, https://apps.who.int/gho/data/node.main.A893ADO?lang=en (last accessed 16.03.21)
Notes:	% of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions:

% Adolescents insufficiently active (age standardised estimate)

Average daily frequency of carbonated soft drink consumption

Children, 2009-2015

Survey type:

Measured

Age:

12-17
