

Brazil: Overweight/obesity by region

Adults, 2012

Survey type:	Self-reported
Age:	18+
Sample size:	Approx 54000
Area covered:	National

References: MALTA, Deborah Carvalho et al. Trends in prevalence of overweight and obesity in adults in 26 Brazilian state capitals and the Federal District from 2006 to 2012. Rev. bras. epidemiol. [online]. 2014, vol.17, suppl.1 [cited 2016-04-20], pp.267-276.

Notes: Prevalence of Obesity by Cities in each Region. The VIGITEL data analyzed in this study include weight and height reported by the respondents as well as their age, gender and level of schooling/education. In 2012, the VIGITEL performed the imputation of the missing data on weight and height.

Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m², obesity refers to a BMI greater than 30kg/m².
