Definitioner (kun tilgængelig på engelsk):	The Japanese Society for the Study of Obesity cutoffs define BMI ≥ 25 as obesity. As this study reports BMI by 25-29.9 & 30 this is shown here to allow for comparison with non-Asian WHO cutoffs.
Medmindre andet er angivet, henviser overvægt til en BMI på mellem 25 kg og 29,9 kg/m², fedme henviser til en BMI på mere end 30 kg/m².
