

# Austria: Prevalencia de obesidad

Adultos, 2005-2006

<b>Tipo de encuesta:</b>	Medido
<b>Edad:</b>	30-74
<b>Tamaño de la muestra:</b>	1054
<b>Zona abarcada:</b>	Nacional *
<b>Referencias:</b>	Schwarz B. Abdominal obesity and cardiometabolic risk factors in Austria. RdM O&G 2007; 3: 65- 96

**Notas:** \* It should be made clear though that the author of the above survey noted that although the survey population was well balanced and fairly representative, as they were based in a primary care setting, selection bias towards higher morbidity risk could exist. In contrast though volunteers to health screening programs may lead to a selection bias the other way. The author could not determine which effect dominated.

A menos que se indique lo contrario, el sobrepeso se refiere a un IMC entre 25 kg y 29,9 kg/m<sup>2</sup> y la obesidad se refiere a un IMC superior a 30 kg/m<sup>2</sup>.
