

# Australia: Overweight/obesity by socio-economic group

Ragazze, 2017-2018

Tipo di sondaggio:	Misurato
Età:	2-17
Dimensioni del campione:	3769
Area coperta:	Nazionale
Riferimenti:	Australian National Health Survey 2017-18 Available at: <a href="https://www.abs.gov.au/statistics/health/health-conditions-and-risks/national-health-survey-first-results/latest-release#chronic-conditions">https://www.abs.gov.au/statistics/health/health-conditions-and-risks/national-health-survey-first-results/latest-release#chronic-conditions</a> (accessed 27.10.2022)
Note (disponibile solo in inglese):	Socioeconomic areas are quintiles of Socio-Economic Indexes for Areas 2016 (SEIFA 2016), specifically the Index of Relative Socio-Economic Disadvantage (IRSD) (ABS 2018c). Lower socioeconomic areas have greater overall levels of disadvantage. "This index ranks areas on a continuum from most disadvantaged to least disadvantaged. A low score on this index indicates a high proportion of relatively disadvantaged people in an area. We cannot conclude that an area with a very high score has a large proportion of relatively advantaged people, as there are no variables in the index to indicate this. We can only conclude that such an area has a relatively low incidence of disadvantage."
Definizioni (disponibile solo in inglese):	Group 1: Most disadvantaged areas Group 5: Least disadvantaged areas
Cutoffs:	IOTF
