

Australië: Overweight/obesity by socio-economic group

Volwassenen, 2022-2023

Type onderzoek:	Gemeten
Leeftijd:	18+
Monstergrootte:	~12846
In aanmerking komend gebied:	Nationaal
Referenties:	Australian National Health Survey 2022-2023. https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi- (Accessed 03.01.2024)
Notities (alleen beschikbaar in het Engels):	Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight
Definities (alleen beschikbaar in het Engels):	A lower Index of Disadvantage quintile (e.g. the first quintile) indicates relatively greater disadvantage and a lack of advantage in general. A higher Index of Disadvantage (e.g. the fifth quintile) indicates a relative lack of disadvantage and greater advantage in general.

Tenzij anders vermeld, verwijst overgewicht naar een BMI tussen 25 kg en 29,9 kg/m², obesitas verwijst naar een BMI van meer dan 30 kg/m².
