

Australia: Obesity prevalence

Adults, 2022-2023

■ Obesity ■ Overweight

Survey type:	Measured
Age:	18+
Sample size:	~12846
Area covered:	National

References: Australian National Health Survey 2022-2023. <https://www.abs.gov.au/statistics/health/health-conditions-and-risks/waist-circumference-and-bmi/2022#body-mass-index-bmi-> (Accessed 03.01.2024)

Notes: Provision of height, weight and waist measurements were voluntary. Self-reported health status, height, and weight was collected for all participants. In 2022, 41.8% of adult respondents did not have their height and/or weight measured. For these people, height and weight were imputed using a range of information including their self-reported height and weight

Unless otherwise noted, overweight refers to a BMI between 25kg and 29.9kg/m², obesity refers to a BMI greater than 30kg/m².
