

Kroatien: Overweight/obesity by socio-economic group

Piger, 2017-2018

Undersøgelsestype:	Selvrapporteret
Alder:	11-15
Prøvens størrelse:	12,794
Area covered:	National
Referencer:	World Health Organization (2020). Spotlight on adolescent health and well-being - Findings from the 2017/2018 Health Behaviour in School-aged Children (HBSC) survey in Europe and Canada. Available at: https://apps.who.int/iris/bitstream/handle/10665/332091/9789289055000-eng.pdf . Last accessed: 20.05.21.
Noter (kun tilgængelige på engelsk):	HBSC Family Affluence Scale (FAS) - "HBSC uses an alternative measure, the Family Affluence Scale, which asks young people about material assets such as family cars, number of foreign holidays, computers, bathrooms and dishwashers in the household, holidays and having a bedroom to oneself. The scale, which enables users to add up how many of these assets a young person has in their home compared with other adolescents in their country/region, has been shown to provide a valid indicator of relative affluence."
Definitioner (kun tilgængelig på engelsk):	HBSC Family Affluence Scale (FAS)
