Poznámky:	Economic situation was defined by the study of origin in the following way: "the basis for assessment is a conventional point score that is calculated on the basis of value of the family's property provided by the child himself/herself (number of cars, computers, joint family holiday trips; does the child have his/her own room at home). The values of the score range from 0 to 9 (since 2013/2014 0 to 13). The economic situation is poor: score 0–3 (since 2013/2014 0–6); average: score 4–5 5 (since 2013/2014 7–9); good: score 6–9 (since 2013/2014 10–13)"
Definice (k dispozici pouze v angličtině):	Categories as defined by survey of origin.
