

# Саудитска Арабия: Наднормено тегло/затлъстяване по възраст

Деца, 2006

■ Затлъстяване ■ Наднормено тегло

<b>Тип анкета:</b>	Измерено
<b>Количество на пробите:</b>	7056
<b>Обхваната зона:</b>	Eastern Province
<b>Референции:</b>	Al-Dossary SS, Sarkis PE, Hassan A, Ezz El Regal M, Fouda AE. Obesity in Saudi children: a dangerous reality. East Mediterr Health J. 2010 Sep;16(9):1003-8.
<b>Забележки:</b>	This study used the Centers for Disease Control and Prevention (CDC) 2000 growth charts to define BMI. The children were classified into 3 weight categories: normal weight (BMI < 85th percentile for age and sex), overweight(BMI between 85th-95th percentiles) and obese (BMI > 95th percentile).
<b>Cutoffs:</b>	CDC
