Bibliografia:

Borić-Kostić, K., Simić, S., Kasiljević, N., et al. Risk factors associated with overweight among adolescents in Serbia. *Slovenian Journal of Public Health*. December 2014; 53(4):283-293.

Uwagi:

CDC growth charts were used to calculate BMI-for-age and sex for the population of children and adolescents. Those with a BMI value higher or equal to the 85th percentile are overweight (between 85 and 95 have a high risk of obesity, and obese are those whose level is higher than or equal to 95%).

Cutoffs:
