

Turkey: Overweight/obesity by education

Children, 2005

Survey type:	Measured
Age:	6-16
Sample size:	1348
Area covered:	Regional
References:	Discigil, G., Tekin, N. and Soylemez, A. (2009), Obesity in Turkish children and adolescents: prevalence and non-nutritional correlates in an urban sample. Child: Care, Health and Development, 35: 153–158. doi: 10.1111/j.1365-2214.2008.00919.x
Notes:	Region - Western Anatolia. Prevalence of overweight and obesity by Paternal Education. The Centres for Disease Control 2000 growth charts for children and adolescents were used to identify BMI percentiles. BMI between 85th and 95th percentile was defined as overweight and BMI at or above 95th percentile was defined as obesity (Himes & Dietz 1994).
