| Huomiot:        | The first two months of the survey results were based on interview, the remaining period was measured. A correction formula was put in place to adjust for the self-report response.                                                                                           |
| Määritelmät:    | Scottish Index of Deprivation 5th Least deprived, 1st Most deprived                                                                                                                                                                                                            |

Ellei toisin mainita, ylipaino viittaa kehon painoindeksiin 25–29,9 kg/m², lihavuus viittaa yli 30 kg/m²:n painoindeksiin.
