Australija: Overweight/obesity by socio-economic group

Berniukai, 2017-2018

Legend: ■ Nutukimas   ■ Antsvoris
Tyrimo tipas:	Išmatuotas
Amžius:	2-17
Imties dydis:	3769
Teritorija:	Nacionalinis
Nuorodos:	Australian National Health Survey 2017-18 Available at: https://www.abs.gov.au/statistics/health/health-conditions-and-risks/national-health-survey-first-results/latest-release#chronic-conditions (accessed 27.10.2022)
Pastabos (tik anglų k.):	Socioeconomic areas are quintiles of Socio-Economic Indexes for Areas 2016 (SEIFA 2016), specifically the Index of Relative Socio-Economic Disadvantage (IRSD) (ABS 2018c). Lower socioeconomic areas have greater overall levels of disadvantage. "This index ranks areas on a continuum from most disadvantaged to least disadvantaged. A low score on this index indicates a high proportion of relatively disadvantaged people in an area. We cannot conclude that an area with a very high score has a large proportion of relatively advantaged people, as there are no variables in the index to indicate this. We can only conclude that such an area has a relatively low incidence of disadvantage."
Apibrėžimai (anglų k.):	Group 1: Most disadvantaged areas Group 5: Least disadvantaged areas
Cutoffs:	IOTF
