

Russische Föderation: Overweight/obesity by region

Kinder, 1992

■ Adipositas ■ Übergewicht

Umfragetyp:

Gemessen

Alter:

6-9

Stichprobengröße:

Total sample size (6-18yrs old) = 6883

Geltungsbereich:

National

Referenzen:

Youfa Wang. Cross-national comparison of childhood obesity: the epidemic and the relationship between obesity and socioeconomic status. Int. J. Epidemiol. (2001) 30 (5): 1129-1136. doi: 10.1093/ije/30.5.1129

Anmerkungen (nur in englischer Sprache verfügbar):

The study used the US NCHS body mass index ($BMI = \text{wt}/\text{ht}^2$) reference to define obesity ($BMI \geq 95^{\text{th}} \text{ percentile}$) and overweight ($85^{\text{th}} \leq BMI < 95^{\text{th}} \text{ percentile}$).
