**Anmerkungen (nur in englischer Sprache verfügbar):** Body Mass Index is derived from measured height and weight. In 2014-15, 26.8% of respondents aged 18 years and over did not have their height, weight or both measured. For these respondents, imputation was used to obtain height, weight and BMI scores. For more information see Appendix 2: Physical measurements in the National Health Survey.

Wenn nicht anders angegeben, bezieht sich Übergewicht auf einen BMI zwischen 25 kg und 29,9 kg/m², Adipositas auf einen BMI über 30 kg/m².
