

# An tSín: Insufficient physical activity

Buachaillí, 2010

|                                          |                                                                                                                                                                                             |
|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aois:                                    | 11-17                                                                                                                                                                                       |
| Tagairtí:                                | Global Health Observatory data repository, World Health Organisation, <a href="http://apps.who.int/gho/data/node.main.A893?lang=en">http://apps.who.int/gho/data/node.main.A893?lang=en</a> |
| Nótaí:                                   | % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.  |
| Sainmhínithe (ar fáil i mBéarla amháin): | % Adolescents insufficiently active (age standardised estimate)                                                                                                                             |
