**Nótaí:** This report uses the revised International Obesity Task Force (IOTF) BMI reference values to classify overweight and obesity in children and adolescents aged 2–14 years (Cole and Lobstein 2012). The IOTF cut-off points are sex- and age-specific, and are designed to coincide with the World Health Organization’s adult BMI cut-off points at the age of 18 years.

Mura gcuirtear a mhalairt in iúl, is ionann rómheáchan agus ICM idir 25kg agus 29.9kg/m<sup>2</sup>, is ionann murtall agus ICM níos mó ná 30kg/m<sup>2</sup>.
