| Riferimenti:                        | The Namibia Ministry of Health and Social Services - MoHSS - and ICF International. 2014. The Namibia Demographic and Health Survey 2013. Windhoek, Namibia: MoHSS/Namibia and ICF International.                                                                                                                                                                                                                                                                            |
| Note (disponibile solo in inglese): | Demographic Health Survey data includes ever married women aged 15-49 years only and may include males aged 15-59. 3922 females, 3575 males NB. Combined adult data estimated. These estimates were calculated by weighting male and female survey results. Weighting based on World Bank Population % total female 2019 ( <a href="https://data.worldbank.org/indicator/SP.POP.TOTL.FE.ZS">https://data.worldbank.org/indicator/SP.POP.TOTL.FE.ZS</a> - accessed 19.10.20)' |

Salvo diversa indicazione, il sovrappeso si riferisce a un BMI compreso tra 25 kg e 29,9 kg/m², l'obesità si riferisce a un BMI superiore a 30 kg/m².
