Definities (alleen beschikbaar in het Engels):

The NSHE data was analyzed using the 2007 growth charts, which defined overweight as BMI $\geq 85^{\text{th}}$ percentile and $< 95^{\text{th}}$ percentile for the corresponding sex and age, and obesity was defined as BMI $\geq 95^{\text{th}}$ percentile for the corresponding sex and age or BMI $\geq 25 \text{ kg/m}^2$
