

# WHO Americas region

## Regional report card - children

*This report card contains the latest data available on the Global Obesity Observatory on overweight and obesity for children, including adolescents (aged 5 to 18 years). Where available, data on common and relevant obesity drivers and comorbidities are also presented.*

*View the latest version of this report on the Global Obesity Observatory at <https://data.worldobesity.org/region/who-americas-region-3/>.*

| Contents                                                       | Page |
|----------------------------------------------------------------|------|
| Obesity prevalence                                             | 3    |
| Insufficient activity                                          | 6    |
| Prevalence of at least daily carbonated soft drink consumption | 9    |
| Average daily frequency of carbonated soft drink consumption   | 11   |
| Prevalence of less-than-daily fruit consumption                | 12   |
| Prevalence of less-than-daily vegetable consumption            | 13   |
| Average weekly frequency of fast food consumption              | 14   |
| Mental health - depression disorders                           | 15   |
| Mental health - anxiety disorders                              | 18   |

## Obesity prevalence

### Children

Survey type:

Countries marked with a \* are using self-reported data.

Notes:

Different methodologies have been used to collect this data and so it is not strictly comparable.

## Boys

Survey type:

Countries marked with a \* are using self-reported data.

Notes:

Different methodologies have been used to collect this data and so it is not strictly comparable.

## Girls

Survey type:

Countries marked with a \* are using self-reported data.

Notes:

Different methodologies have been used to collect this data and so it is not strictly comparable.

# Insufficient activity

## Children, 2016

Survey type: Self-reported

Age: 11-17

References: Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en> (last accessed 16.03.21)

Notes: % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions: % Adolescents insufficiently active (age standardised estimate)

## Boys, 2016

Survey type: Self-reported

Age: 11-17

References: Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en> (last accessed 16.03.21)

Notes: % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions: % Adolescents insufficiently active (age standardised estimate)

## Girls, 2016

Survey type: Self-reported

Age: 11-17

References: Global Health Observatory data repository, World Health Organisation, <https://apps.who.int/gho/data/node.main.A893ADO?lang=en>  
(last accessed 16.03.21)

Notes: % of school going adolescents not meeting WHO recommendations on Physical Activity for Health, i.e. doing less than 60 minutes of moderate- to vigorous-intensity physical activity daily.

Definitions: % Adolescents insufficiently active (age standardised estimate)

## Prevalence of at least daily carbonated soft drink consumption

### Boys, 2021-2022

Area covered: National

References: Health Behaviour in School-aged Children study (2023), Data browser (findings from the 2021/22 international HBSC survey): <https://data-browser.hbsc.org..> Health Behaviour in School-aged Children study (2020), Data browser (findings from the 2017/18 international HBSC survey): <https://data-browser.hbsc.org>.

Definitions: Proportion who reported drinking sugary soft drinks daily (at least once)

## Girls, 2021-2022

Area covered:

National

References:

Health Behaviour in School-aged Children study (2023), Data browser (findings from the 2021/22 international HBSC survey): <https://data-browser.hbsc.org..> Health Behaviour in School-aged Children study (2020), Data browser (findings from the 2017/18 international HBSC survey): <https://data-browser.hbsc.org.>

Definitions:

Proportion who reported drinking sugary soft drinks daily (at least once)

## Average daily frequency of carbonated soft drink consumption

Children, 2009-2015

Survey type: Measured

Age: 12-17

References: Beal et al. (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287> sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

# Prevalence of less-than-daily fruit consumption

## Children, 2009-2015

Survey type: Measured

Age: 12-17

References: Global School-based Student Health Surveys. Beal et al (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287>. Sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

Definitions: Prevalence of less-than-daily fruit consumption (% less-than-daily fruit consumption)

## Prevalence of less-than-daily vegetable consumption

### Children, 2009-2015

Survey type: Measured

Age: 12-17

References: Beal et al. (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys. Food and Nutrition Bulletin. <https://doi.org/10.1177/0379572119848287> sourced from Food Systems Dashboard <http://www.foodsystemsdashboard.org/food-system>

Definitions: Prevalence of less-than-daily vegetable consumption (% less-than-daily vegetable consumption)

## Average weekly frequency of fast food consumption

Children, 2009-2015

Age:

12-17

References:

Beal et al. (2019). Global Patterns of Adolescent Fruit, Vegetable, Carbonated Soft Drink, and Fast-food consumption: A meta-analysis of global school-based student health surveys.
